

A 12x12 grid visualization of a handwritten digit '4'. The grid is plotted on a coordinate system with both x and y axes ranging from 0 to 12. The background is a dark purple color. The digit '4' is represented by a collection of yellow and light green pixels. The yellow pixels form the main structure of the digit, while the light green pixels are scattered around it, possibly representing noise or a different class of pixels. The digit is oriented vertically, with its top at the top of the grid and its bottom at the bottom. The x-axis is labeled at 0, 5, and 10. The y-axis is labeled at 0, 2, 4, 6, 8, 10, and 12.
